Execution Time & Bandwidth

Execution/Response time

the time between the start & completion of a task

< □ ▶ < □ ▶ < ≧ ▶ < ≧ ▶ E りへで 11/16

Bandwidth/Throughput

the total amount of work done in a given time

Execution Time & Bandwidth Example

Do the following changes to a computer system increase throughput, decrease response time, or both?

- 1. Replacing the processor in a computer with a faster version
- 2. Adding additional processors to a system that uses multiple processors for separate tasksfor example, searching the web
